Professional Summary

Full-Stack Software Developer with 10+ years of IT experience, including 5+ years of hands-on application development. Specialized in building scalable web and mobile application using Laravel, React and Flutter. Experienced in architecting RESTful APIs, designed optimized database schemas, and deploying cloud-native solutions on AWS. Strong background in secure system design, performance optimization, and end-to-end software lifecycle management. Combines development expertise with infrastructure knowledge to deliver reliable, production-ready enterprise systems.

Technical Skills

Languages	: PHP, JavaScript, C#, VB.NET
Frontend	: React.js, Next.js, HTML5, CSS3, Bootstrap
Backend	: Laravel, Node.js, Express.js, CodeIgniter
Mobile Development	: Flutter, React Native
Databases	: MySQL, Microsoft SQL Server, MongoDB, SQLite
Cloud & DevOps	: AWS (EC2, RDS, S3, IAM), Vercel, CI/CD
Operating Systems	: Windows, Linux
Tools	: Git, GitHub, Bitbucket, Postman, VS Code, Android Studio, NPM, Composer, Figma, Codemagic

Professional Experience

Software Developer

Pedro, Singapore

Sep 2020 – Present

- Architected and developed enterprise grade workforce and security management platform solutions using Laravel (PHP) for web and Flutter for cross-platform mobile applications.
- Designed scalable RESTful APIs supporting web and mobile applications with secure authentication and role-based access control (RBAC).
- Built and deployed cloud-native applications on AWS with high availability, auto scaling, and secure infrastructure configuration.
- Developed offline-first mobile modules with background synchronization to ensure operational continuity in low-network environments.
- Optimized database queries and backend logic, improving API response times and overall system performance.
- Led full software development lifecycle (SDLC) including requirement analysis, architecture design, development, testing, deployment, and production support.
- Integrated third-party services including email gateways, QR authentication systems, and cloud storage services.
- Implemented secure coding practices and encryption protocols to ensure data protection and compliance standards.

IT Support Engineer

Digital Alarm Technologies, Singapore

Mar 2018 – Jul 2020

- Supported enterprise IT infrastructure including Windows and Linux Servers.
- Assisted in server migrations from Windows Server 2008 to Windows Server 2016.
- Managed patching, upgrades, and system maintenance to ensure high availability and minimal downtime.
- Provided Tier 2 technical support for application and network-related issues.

Support Engineer

Hinduja Global Solutions, India

Jun 2016 – Jan 2018

- Troubleshoot hardware, software, and network-related issues.
- Managed system installations and workstation configurations across departments.

Support Engineer

KBG Services, India

Jun 2015 – May 2016

- Maintained Windows server infrastructure and network-related.

Projects

iSecure360 – Workforce & Security Management Platform

Technologies: Laravel, MySQL, Flutter, AWS

- Architected and developed a full-scale security workforce management platform with web and cross-platform mobile applications.
- Implemented GPS-based guard tour tracking with offline-first mobile functionality.
- Built modules for attendance tracking, incident reporting, checklist management, and leave management.
- Designed secure APIs and encrypted data communication.
- Deployed scalable infrastructure on AWS with load balancing and database optimization.

iSecure360 – Visitor Management System

Technologies: Laravel, MySQL, Flutter, AWS

- Designed and developed a secure visitor and contractor management system to streamline check-in/check-out workflows.
- Implemented QR-based digital check-in/check-out workflows.
- Built real-time monitoring dashboard for visitor tracking.
- Developed RESTful APIs for mobile and web integration.
- Optimized backend performance for high concurrency usage.

AVMS – Access Control & Visitor Management System

Technologies: React.js, MySQL, Flutter, AWS

- Architected and delivered a scalable access control and visitor management platform with web (React.js) and cross-platform mobile applications (Flutter).
- Integrated ANPR (Automatic Number Plate Recognition) and Smart door access systems to enable seamless, automated entry for residential communities.
- Designed and developed modular features including facility booking, visitor pre-registration, and feedback management workflows.
- Built secure RESTful APIs with encrypted data transmission and role-based access control (RBAC).

- Deployed and managed cloud infrastructure on AWS (EC2, RDS, S3, IAM), optimized for high concurrency and reliability.
- Optimized backend database queries and indexing strategies to improve response time and system performance.

Additional projects available upon request or via GitHub/Portfolio

Education

Bachelor of Engineering (Computer Science and Engineering)

Panimalar Engineering College, Anna University

Chennai, Tamil Nadu, India

2011 – 2015

Certifications

- ITIL Foundation – PeopleCert
- Google IT Support Professional Certificate – Coursera
- Full Stack Web Development – Udemy
- Mobile App Development (Flutter) – Udemy
- Python Programming - Skillup
