Professional Summary

Results-driven Software Developer with over 10 years of IT experience since 2015, including 5+ years of hands-on application development and 5+ years in IT infrastructure and systems engineering. Experience in designing, developing, testing and deploying scalable web and mobile applications across full development lifecycles.

String proficiency in PHP, JavaScript, React, C# and Flutter, with practical experience building RESTful APIs, dynamic front-end interfaces, and cross-platform mobile applications. Skilled in modern deployment and cloud environments including AWS and Vercel, with solid understanding of CI/CD practices, cloud architecture and performance optimization.

Well-versed in system integration, database management, server configuration and troubleshooting complex technical issues. Adept at writing clean, maintainable and efficient code while ensuring application reliability, security and scalability. Combines development expertise with infrastructure knowledge to deliver robust, production ready solutions in agile environments.

Work Experience

Pedro

Software Developer / IT Engineer

Singapore

Sep 2020 - Current

- Architected and developed enterprise grade security solutions including iSecure360 using Laravel (PHP) for web and Flutter for cross-platform mobile applications; led AWS cloud deployment with high availability, auto-scaling, load balancing and security hardening.
- Designed and implemented a Visitor Management System (iSecureVMS) using Laravel and Flutter, integrating real-time monitoring, secure authentication, and cloud-based infrastructure on AWS to ensure reliability and scalability.
- Developed custom Inventory Management and Service Order Management Systems tailored to client requirements, including RESTful APIs, database schema design, and mobile integration.
- Managed full software development lifecycle (SDLC): requirements analysis, system architecture design, development, testing, deployment, and post-production support.
- Administered and maintained Windows and Linux servers, including installation, configuration, patch management, system upgrades, performance monitoring, and backup strategies.
- Deployed and configured on-premises iRedMail secure email gateway integrated with email archiving solutions to enhance data retention, compliance, and reduce storage costs.
- Strengthened organizational cybersecurity posture by implementing UTM firewalls (Sophos & FortiGate) with IPS, vulnerability scanning, network segmentation, and centralized Trend Micro endpoint protection.
- Designed and enforced backup, disaster recovery, and business continuity strategies across cloud and on-premise environments.
- Provided Tier 2/3 technical support, troubleshooting complex system, application, and network-level issues.

Digital Alarm Technologies

IT Support Engineer

Singapore

Mar 2018 – Jul 2020

- Acting as primary contact for computer hardware and software problems, as well as network emergencies.
- Managed installation, configuration, maintenance, upgrade and backups of Windows and Linux based server machines.
- Involved in rollout of servers and software updates/patches and investigate on complex and specialist IT issues.
- Migrated all the services from Windows Server 2008 to Windows Server 2016.
- Setting up and configuring new hire PCs and laptops using deployment console images, and setting up office hardware.

Hinduja Global Solutions

Support Engineer

Bangalore, Karnataka – India

Jun 2016 – Jan 2018

- Troubleshoot and resolve hardware, software and network related issues.
- Setting up and configuring new hire PCs and laptops using deployment console images, and setting up office hardware.
- Install and configure software applications and peripheral devices.

- Managed installation, configuration, maintenance, upgrade and backups of Windows and Linux based server machines.

KBG Services

Hosur, Tamil Nadu – India

Support Engineer

Jun 2015 – May 2016

- Managed installation, configuration, maintenance, upgrade and backups of Windows based servers and workstations.
- Ensured that all hardware, operating systems, software and procedures aligned with organizational standards and strategic business plan.
- Resolved a history of problematic network failure by troubleshooting LAN/WAN connections between multiple stores for a regional retail chain.

Projects

iSecure360

Laravel PHP, MySQL & Flutter

Complete Security Solutions

- Architected and developed a full-scale security workforce management platform with web and cross-platform mobile applications.
- Designed and implemented modules including:
 - Guard attendance tracking
 - Incident reporting system
 - Guard tour management with GPS tracking
 - Supervisory checklist management
 - Leave management system
- Engineered offline-first functionality for guard tour operations with automatic background synchronization upon network reconnection.
- Implemented secure authentication and role-based access control (RBAC), ensuring data encryption and secure API communication.
- Optimized database queries and backend logic, improving application performance and reducing response time.
- Deployed and managed the solution in a scalable AWS cloud environment.

iSecureVMS

Laravel PHP, MySQL & Flutter

Complete Security Solutions

- Designed and developed a secure visitor and contractor management system to streamline check-in/check-out workflows.
- Implemented features including:
 - Visitor & contractor digital registration
 - Pre-registration with automated email notifications
 - QR code-based secure check-in and check-out
 - Real-time visitor monitoring dashboard
- Developed RESTful APIs to support mobile and web integration.
- Applied best practices for authentication, authorization, and encrypted data transmission.
- Performed backend and database performance tuning for high concurrency usage.

Additional projects available upon request or via GitHub/Portfolio

Technical Skills

Programming Languages	: PHP, C#, VB.NET, JavaScript
Frontend Technologies	: HTML5, CCS3, Bootstrap, React.js, Next.js
Backend Technologies	: Laravel, CodeIgniter, Node.js, Express.js
Mobile Development	: Flutter, React Native
Databases	: MySQL, Microsoft SQL Server, MongoDB, SQLite
Cloud & Deployment platforms	: AWS, Vercel
Operating Systems	: Windows, Linux
Tools	: Git, GitHub, Bitbucket, VS Code, Android Studio, Postman, NPM, Yarn, Composer, Vite, Prettier, Figma, Codemagic

Education

Panimalar Engineering College (Anna University)

Chennai, Tamil Nadu – India

BE / B. Tech in Computer Science and Engineering

Aug 2011 – May 2015
